

SECRET**DD/A Registry****File** Cinema-4

11 May 1979

Bob,

The Agency now has 9 KY-70 units which were allocated by the NCS and assigned to the Executive Secure Voice Network PILOT Program; and their use in this program must be revalidated periodically. The next revalidation is July 1979 and as a result they are subject to reallocation.

25X1 The Agency just received four of 40 KY-70 units which are for our exclusive use. Thirty-two of these systems will be installed at field locations in support of Agency requirements; however, current requirements exceed the number of units we are receiving. While [redacted] [redacted] at the top of their priority list (see attached [redacted] memo) the Comptroller has not yet approved any allocations; therefore, suggest the following comment be placed below the concurrence line:

*With the understanding that these 2 KY-70 telephone units count against the overall DDO KY-70 secure voice requirements. [redacted]
